Experience

Product Manager, Patreon
2019 - Present
• **Own vision and strategy** for Patreon's new end-to-end merch fulfillment product
• Lead cross-functional team in shipping impactful features like Sized Products, In-Product Design Tools, and Global Shipping, which have **increased Patreon's monthly recurring revenue from merch by more than 800%**

Sr. Software Engineer, Patreon
2016 - 2019
• **Led teams of developers** in delivering projects like new pricing plans, fan landing pages, and new promotional tools for Creators, which increased MoM revenue more than 100% for adopters
• **Collaborated with VP of Eng** to design and implement technical programs for Engineering including incident management, bug triage, bug tracking and reporting, and backlog management

Software Engineer, Patreon
2015 - 2016
• **Led development** on several high-impact projects including new creator landing pages, which increased checkout conversion by double digits
• Built and helped maintain Patreon's first React / Redux / ES6 environment
• **Recruited, interviewed, and onboarded** engineers through ~5x growth in the frontend engineering team

Software Engineer, Opentable
2014 - 2015
• **Built Opentable's first browser-based app** for restaurant management
• Developed sophisticated tools for designing floorplans, creating shift schedules, and managing table availability, currently **used by 51,000 restaurants to seat more than 1.5 billion diners** per year

Software Consultant, Famous
2013 - 2014
• **Developed interactive demos** using Famous's 3D physics animation engine
• **Managed Famous's Private Beta program**, giving on-site instruction to engineers from companies like Tesla, Flickr, and Automattic

Guitarist, Audio Engineer
2009 - 2013
Worked as a touring guitarist, music director, and audio engineer for a variety of major-label and independent artists, including Grammy nominees
